

Professional

\$1,799 one-time setup · then \$475/month (reg. \$495) — your AI receptionist at promo bundle pricing

Custom design, cinematic sections, and a phone system to match.

Everything in the Business bundle, plus fully custom design with cinematic sections, advanced SEO, a blog, and the Professional-level AI receptionist.

1. Custom Design With Cinematic Sections

We design your site from a blank canvas with cinematic sections and rich graphics.

This is the tier where your site stops resembling anyone else's.

2. Advanced SEO

We map every service and location so Google can rank you for each of them.

Titles, descriptions, structure, and content — tuned page by page.

3. Pages That Do Work

We build service and product pages, a blog or news section, and custom forms.

Content you can grow, forms that route enquiries the right way.

4. Lead-Generation Optimization

We tune the whole site around converting visitors into enquiries.

Layout, calls-to-action, and forms placed where they actually get used.

5. Your AI Receptionist, Included

Your monthly includes the Professional AI receptionist — custom conversation flows, CRM integration, call reporting — with 2,000 minutes and 1,000 texts (\$0.35/min, \$0.05/text after).

Same service as our AI Solutions lane — answered calls, bookings, summaries — at a promotional monthly rate because you bundled it with your website. The AI voice assistant setup fee is waived when bundled.

6. Free Web Support While Subscribed

We host, maintain, fix, and update your website free while your AI subscription is active.

Something breaks, something changes, you need an edit — covered. (\$160/month on its own if you ever cancel the AI plan.)

What this means for you

You get the website of a much bigger company and the phone operation to match — built once, maintained continuously, reported monthly.
